Introduction:

Online Tour and Traveling Booking is a system that gives you facility of booking any type of Tours and Travels.This system is made so that Customer will not have to Come to us to Book his\her Tours.The project ‘Tours and Travels Management System’ is developed to replace the currently existing system, which helps in keeping records of the customer,details of destination as well as payment received.In the present era where “time” proves to be the most important asset for an individual by replacing the current register system to fully computerize, it not only saves the precious asset that is time, but also accuracy, reliability and uniformity can be maintained.This project is useful for the manager of the company as it helps them to search the data faster than existing system, to get customer record easily and report of the customer, payment, etc are generated as per requirement

Requirement:

- Software :
  Windows OS : xp / 7 / 8 / 8.1 or Mac OS or Linux

Browser like (Chrome ,Mozila ,IE)

- Hardware:
  Processor:Pentium or Higher
  RAM :128MB or Higher.

FEASIBILITY:

Technical Feasible :

Technically, this project is very feasible because of use of current and latest techniques.

Financial Feasible:

Financially ,It is also very feasible it made up in very low cost and will be free for all customers.

Operational Feasible:

Very easy to use.

FUTURE SCOPE:

The project made here is just to ensure that this product could be valid in today real challenging world. Here all the facilities are made and tested.

Currently it is not visible on virtual world (Internet) because of some limitations of project. In future it may be there.

Conclusion:

Tours & Travels Management System Transport solution to the different companies situated locally in the many districts and it organizes tours to various part of the country. Earlier all the processes were done manually.The manual process is done by maintaining the details of the tours,employees and their customers.

THANKYOU
